

Vijaykumar Peddamuthu

Lead UX Designer

AI-augmented design | Enterprise SaaS & cybersecurity (AppSec, SecOps, IAM)
Bangalore, Karnataka, India | vijaykumarpdm@live.com | +91 97428 51797 | [LinkedIn](#)

SUMMARY

Lead UX Designer with **12+ years** in enterprise SaaS, including **8+ years** inside OpenText's (heritage Micro Focus) cybersecurity business unit across Application Security (SAST, DAST, SCA, MAST), Security Operations, and Identity & Access Management. Designs both sides of the AI story: AI-driven features shipped inside the product and the AI-augmented workflow behind the work (see Highlights below), while carrying informal delivery leadership for the business unit — setting UX standards, mentoring designers, and aligning roadmaps across time zones.

HIGHLIGHTS

- **+25% feature adoption** from AI-driven predictive analytics and personalization features designed into the product.
- **-30% design delivery time** from an AI-augmented design workflow (Claude, ChatGPT, Figma Make) introduced across the team.
- **-20% support tickets, +35% task completion** from redesigned Application Security workflows built around real user friction.

SKILLS

UX design & strategy: UX Strategy, Interaction & Visual Design, Design Systems & Component Libraries, Information Architecture, Wireframing & Prototyping, Journey Mapping, User Research & Usability Testing, Accessibility (WCAG 2.1)

AI-augmented design workflow: Claude, ChatGPT, Figma Make, Magic Patterns, Napkin AI, Perplexity, Midjourney

AI-driven product design: Predictive Analytics, Personalization, Human-AI Interaction Design

Leadership & delivery: Cross-Functional Collaboration, Stakeholder Management, Delivery Leadership, Design Ops, Mentoring & Team Development, Workshop Facilitation, Cross-Timezone Delivery Ownership

Security & enterprise domain: Application Security (AppSec), Security Operations (SecOps), Identity & Access Management (IAM), SAST, DAST, SCA, MAST, Zero Trust, DevSecOps, Enterprise SaaS

Design tools: Figma, FigJam, Adobe XD, Sketch, InVision, Axure RP, Miro, Photoshop, Illustrator, HTML5, CSS3, JavaScript

PROFESSIONAL EXPERIENCE

Lead UX Designer / UX Leader — OpenText (Heritage Micro Focus), Cybersecurity Business Unit

Sep 2018 - Present
Bangalore, India

- **Product & portfolio ownership:** Own UX across three product groups in one business unit — Application Security (SAST, DAST, SCA, MAST), Security Operations, and Identity & Access Management — from research through shipped features.
- **AI-driven feature design:** Designed predictive-analytics and personalization features for the Security Operations product line, growing feature adoption **25%** after launch.
- **AI-augmented delivery:** Introduced an AI-augmented design workflow (Claude, ChatGPT, Figma Make, Magic Patterns) across the team, cutting design delivery time **30%**.
- **Application security UX:** Redesigned core Application Security workflows by targeting real user friction, reducing support tickets **20%** and increasing task completion **35%**.
- **Identity & Zero Trust UX:** Led UX strategy for Identity & Access Management, including Zero Trust-aligned flows, from early research through shipped features.
- **Design systems:** Built a design system and component library from scratch, adopted across AppSec, SecOps, and IAM teams, shortening the handoff time between finished design and working build.
- **Delivery leadership & mentoring:** Carried informal delivery-leadership responsibilities for the business unit for several years — setting design standards, coordinating across time zones, and mentoring designers through critique.
- **Career progression:** Senior UX Designer, Lead UX Designer, UX Leader — progressed based on scope and impact of work delivered.

UX Designer — WinWire Technologies India Pvt. Ltd

Mar 2014 - Aug 2018
Bangalore, India

- **B2B product design:** Delivered end-to-end design — discovery, wireframes, visual design, and user flows — for enterprise portal and intranet engagements, including work for clients such as Tesla, SanDisk, VISA, Brocade Communications, Lumileds, MemorialCare, and L'Oréal.
- **Front-end handoff:** Built static front-end pages (HTML, CSS, JavaScript) as part of design handoff, addressing accessibility considerations before development.
- **Global delivery model:** Worked within an onsite-offshore delivery model, turning requirements relayed by onsite coordinators into wireframes, visual designs, and dev-ready flows across multiple concurrent projects and deadlines.
- **Pre-sales support:** Contributed proof-of-concept designs used in pre-sales pitches, some of which converted into signed client engagements.

AWARDS & RECOGNITION

UX Leadership Excellence • Design Innovation Award • Outstanding Contributor • Customer Impact Award • Mentorship Recognition • Spot Awards (multiple years) • Rising Star in UX Design

EDUCATION & CONTINUOUS LEARNING

Bachelor's Degree — Sunrise University, Alwar, India

Ongoing coursework: Interaction Design Foundation (IDF) and Nielsen Norman Group (NN/g) — UX research and design; applied AI-assisted design tooling, including prompt engineering for UX ideation, generative design, and AI-assisted prototyping.
